

3-8 YEARS

EARLY

To treat problems soon

PERIODIC

To set up regular appointments

SCREENING

To check for a medical problem

DIAGNOSIS

To find a medical problem

TREATMENT

To care for a problem

Why are EPSDT screenings important?

Seeing your primary care physician (PCP) regularly and caring for problems early could:

- Help your PCP get to know your child
- Help your child stay healthy as he or she grows
- Find health problems before they get worse
- Stop health problems that make it hard for your child to learn
- Help your child have a healthy smile

How do I start?

Make an appointment with your child's primary care physician (PCP). Contact Magnolia Health to get help with:

- Finding a provider or dentist
- Setting up an appointment
- Arranging transportation to the appointment
- Answering your questions about screenings or immunizations
- Talking with a case manager to help you find and get other services

What happens after seeing your PCP?

After the screening, the provider will help you understand the results. If you do not understand something, feel free to ask questions. Here's what could happen if the doctor finds a problem:

- For special problems, the provider will treat the problem or refer your child to a specialist for help.
- For vision problems, your child could see an eye doctor and get eyeglasses.
- For hearing problems, your child could see a specialist and get hearing aids.
