To set up
regular
appointments

SCREENING

To check for
a medical
problem

DIAGNOSIS

To find a
medical
problem

TREATMENT

To care
for a
problem

Why are EPSDT screenings important?

Seeing your primary care physician (PCP) regularly and caring for problems early could:

- Help your PCP get to know your child
- Help your child stay healthy as he or she grows
- Find health problems before they get worse
- Stop health problems that make it hard for your child to learn

How do I start?

Make an appointment with your child's primary care physician (PCP). Contact Magnolia Health to get help with:

- Finding a provider
- Setting up an appointment
- Arranging transportation to the appointment
- Answering your questions about EPSDT screenings or immunizations
- Talking with a case manager to help you find and get other services

What happens after seeing your PCP?

After the EPSDT screening, the provider will help you understand the results. If you do not understand something, feel free to ask questions. Here's what could happen if the doctor finds a problem:

- For special problems, the provider will treat the problem or refer your child to a specialist for help.
- For vision problems, your child could see an eye doctor.
- For hearing problems, your child could see a specialist.

When and how often do I need to schedule a screening?

Getting an EPSDT screening at the right time is the best way to make sure your child continues to be healthy.

Babies need EPSDT screenings at:

Toddlers need check-ups at:

My Health Pays® Rewards!

EPSDT Screening:

Children 0-1 \$10/per screening with a max of \$50

Children 1-2 \$10/per screening with a max of \$50
