The QI Program strives to make a difference in health outcomes. It develops actions to improve member and provider satisfaction. Magnolia involves providers within our plan. The providers assist with developing and monitoring activities of the QI Program as well as providing insight into preventive health resources and information.

Referrals

You may need to see a certain provider for specific medical problems, conditions, injuries and/or diseases. Talk to your Primary Care Provider (PCP) first. Your PCP will refer you to a specialist in the Magnolia network who can diagnose and/or treat your specific problem. A referral is not required in order to see a specialist, but having a referral from your PCP will help with coordination of care. Some types of specialists will not be able to see you without approval from Magnolia and from your PCP. Exceptions are emergency services, family planning, women's preventive services, and maternity services. If you aren't sure whether or not a referral is needed, speak with your PCP or call Member Services at 1-866-912-6285, Relay 711.

Right Care for You

Getting care that is right for your age and your health needs is important. When your kids are young, they see a provider who knows all about kids' health called a Pediatrician. But when they grow up, their health needs change. That is when it is time to move to a provider who knows about adult health. Your provider and your health plan can help you and your child make this change. If you need help finding a new provider, talk to your provider. Or call Member Services at 1-866-912-6285 Relay 711.

Utilization Management
